

**BCIL licenses technology for Advance Wound Care Dressing to M/s. Inochi Care Pvt. Ltd., Assam.**

Dr. Purnima, MD, BCIL exchanging License Agreement with Mr. Neelarnab Dutta, Managing Director, M/s. Inochi Care Pvt. Ltd., Assam, in gracious presence of Prof. K. VijayRaghavan, Secretary, DBT.

**Advance Wound Care Dressing:**

BCIL has licensed the technology “Advance Wound Care Dressing” to M/s. Inochi Care Pvt. Ltd., Assam, in a formal licensing ceremony which was held on August 10<sup>th</sup>, 2017 at DBT in the presence of Prof. K. VijayRaghavan, Secretary, DBT.

The multi-therapeutic dressing has been developed under School of International Biodesign Programme (SIB), a flagship programme of Department of Biotechnology (DBT), Ministry of Science & Technology, Government of India (GOI), implemented at All India Institute of Medical Sciences (AIIMS) and Indian Institute of Technology (IIT) Delhi with international partners. Biotech Consortium India Limited (BCIL) has been authorized by DBT to manage Techno-legal matters of this programme.

This technology has been developed by SIB Fellows (2016 batch) Neelarnab Dutta, Shivani Gupta, Roshan Gurung and Taihei Fujii, bringing together multidisciplinary skill set to develop a technology that would be beneficial for millions of people suffering from different kind of wounds worldwide. The novel dressing is a versatile, dual therapy dressing which enables accelerated healing of medically complex hard to heal wounds. This “Dual Therapy Dressing” aims to address a \$14.9 billion wound care market worldwide. This innovative product will significantly reduce the disease burden of more than 20 million people suffering from non-healing wounds in India.
